

# **VibePro Online**

**POWERFUL REPORTING AND POST-PROCESSING** 

#### **OVERVIEW**

VibePro 7 and above were built from the ground up to work with a comprehensive web app. The VibePro database is easily uploaded directly within the iPad app. VIBEPRO's web apps allow companies to have multiple personnel analyze the data on their desktop or laptop computer.

#### **VIBEPRO ONLINE**

VibePro Online provides an extensive collection of reporting and analysis tools. Reports are available at any place found in the VibePro route hierarchy, which includes plant, machine, point, and individual measurement reports. Reports include a variety of data points including: a heat map, machine severity pie chart, asset photo, RMS values, severity level, measurement date, spectrum image, waterfall plot of frequency spectra, trend chart, peak values, bearing info, machine speed, and more. Custom logos can also be used in reports. VibePro Online utilizes algorithms that allow you to focus on what really matters. VIBEPRO leverages our extensive knowledge in vibration analysis to inform users on the true health of their assets.

#### **ALGORITHM FEATURES**

#### **VIBEPROPULSE**

A custom vibration signature recognition algorithm developed by VIBEPRO brings a new fault detection t echnology not offered elsewhere. The fault detection algorithm will provide a good starting point for your technicians to fix the asset and return it back to normal vibration levels.

#### VIBEPRO HEATMAP

A custom vibration degradation algorithm developed by VIBEPRO brings a new visualization tool to the health of a plant's assets. The larger the box the faster that asset is degrading. VIBEPRO HeatMap for the first time provides an accurate look at a plant's health. Green assets that are rapidly failing will show up well before an emergency repair is needed. VIBEPRO HeatMap can also be a helpful tool to ensure thresholds are being properly setup.

#### **VIBEPRO ONLINE FEATURES**

DIRECT UPLOAD: Upload from vibepro directly to the web app

MAP INTEGRATION: View location of where measurement was taken

**CUSTOM LOGO:** Use custom logos for reports

**OVERALL VIBRATION TREND CHART:** View a trend chart of a measurement point

PHOTO SUPPORT: View a photo of the asset

SPECTRUM VIEW: Full spectrum With Zoom And Mark Up Support

WATERFALL PLOT: View readings in waterfall mode

TEMPERATURE TREND: View temperature data from VIBEPRO-220 sensor or manual entry in VibePro

HZ OR CPM OPTION: View spectrum in either Hz or CPM

BEARING MARKERS: View bearing markers setup in VibePro

RPM MARKERS: View up to 5x RPM markers (4x max on Lite)

SORT HIERARCHY: View database in alpha or entry order

**REPORTING:** Print reports (measurement level only on Lite)

MULTIPLE DATABASE SUPPORT: Create and manage multiple VibePro databases

VIBEPULSE: Fault detection algorithm to advise corrective actions

VIBEPRO HEATMAP: Total plant visual overview with custom VIBEPRO algorithm to alert user of assets failing at a fast rate

ADVANCED SPECTRUM: More options to post-process spectrum

MAINTENANCE EVENTS: View events created on the iPad and events are included in reports

TIME WAVE FORM SUPPORT: Post process TWF data; view data as TWF, acceleration FFT, velocity FFT or displacement FFT and generate reports

#### **VIBEPRO ONLINE FEATURES**

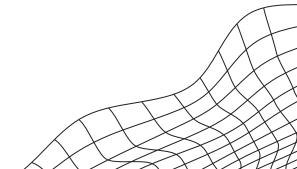

**TRENDING:** View vibration and temperature trend charts. Colored threshold lines indicate when a measurement has passed user configured vibration threshold limits.

**TOTAL PLANT REPORTS:** View an overview of your entire plant or plants. A pie chart is automatically generated to provide an immediate status update.

**SPECTRUM ANALYSIS:** View all past spectrum captures. Bearing markers and RPM markers are available to assist in spectrum analysis.
